

Cloud Transformation and Migration

CALIAN™

IT Professional Services
Services informatique et professionnel

Your Cloud Transformation Partner

Whether you have chosen to move directly to the cloud or to adopt a hybrid cloud approach, the transition can be complex and concerning. What is most important is to have a clear transition plan with the goal of no interruptions to your day-to-day operations.

But you have never done this before. Where do you start? To ensure a successful project, it is critical that you select an established and experienced professional services firm that can work with you to manage the entire change process with your team and your technology ensuring a smooth, controlled and successful transition. A firm that can work with you to design your cloud data architecture with a focus on building cyber security best practices into every aspect of your transition addressing both your data privacy requirements and your identity and access management needs.

Top Concerns in Transitioning to the Cloud

Data security, regulatory & compliance requirements and vendor lock-in are the three most significant concerns enterprises buyers have as they transition workloads to the cloud.

The uncertainty of costs and savings (21%), data portability and ownership (20%), loss of control (upgrades, the timing of backups, etc.) (19%) are the concerns enterprise buyers have when migrating to the cloud. Additional concerns include software compatibility (18%) and reliability (SLA requirements) (14%). The following graphic compares Bain's previous cloud study with their most current research results.

Whether your organization is determined to move all of your services to the cloud, or transition new data while keeping legacy information offline, or if you are interested in exploring options not available from off-the-shelf services, we can work with you to create a solution that will be the right fit for your company.

Cloud-Hybrid Cloud Solutions

Cloud-based technologies are easy to deploy. The challenge is integrating the technology into your business. Our team of expert consultants can help you maximize your investment. Based on an understanding of your unique goals, challenges, and business processes, the highly experienced Galian team will ensure that your cloud technology investment is implemented with a focus on your business objectives.

Also, you can also count on our experienced team to ensure that you have the right Cloud cyber security and data privacy posture, policies and procedures in place.
