

# Emergency Management Solutions

“ More than 2.7 billion people were affected and more than \$1.3 trillion were lost between 2000 and 2011 due to disasters. ”

*- United Nations Office for Disaster Risk Reduction*

**CALIAN**™

## **Calian prepares clients for events where the consequences of failure are unacceptable.**

Trends indicate that the frequency and intensity of disasters and emergencies are increasing dramatically, resulting in greater costs to life, property and the environment.

Additionally, the legislative and regulatory requirements relating to disaster and emergency management are continuously evolving, necessitating that organizations and communities dedicate increasing resources to ensuring they can respond and recover from disruptions effectively.

Since 1996, Calian has prepared well over 200,000 people to meet the most demanding of operational challenges. Our team combines decades of experience in industries such as; energy, transportation, public health and defence with the highest standards in education, training and certification from recognized emergency management bodies.

Our holistic resilience solutions address all phases of emergency management providing mentorship to existing teams or turnkey solutions that address immediate or acute needs.

**Calian is trusted to help keep people safe from the most high-risk and high-consequence events. Contact us today to see how we can help you.**

# Emergency Management Solutions

## Program Development

Calian can support your organization in the development of emergency management programs aligned with recognized standards and best practices. From development of **Hazard Identification and Risk Assessments**, to conducting Audits and Benchmarking, (CZA Z1600) our experts can develop a foundation that will allow your program to be successful.

## Training and Exercises

Calian is a recognized leader in the design and facilitation of emergency management training and exercises for clients operating in high consequence environments. Our accredited experts can provide conventional or customized **Incident Command System (ICS)**, **Incident Management System (IMS)** and emergency management training, as well as exercises ranging in complexity from Tabletop to Full Scale.

## Response Support

In the event of a real emergency, Calian can provide experienced and certified emergency management experts with a wide variety of specialized skills. If your organization requires additional subject matter expertise to respond to a diverse number of incidents, Calian can support your organization's decision makers to ensure you're at your best when things are at their worst.

## Recovery

Calian recognizes that recovery is a complex process with ties to all phases of emergency management. Through provision of After-Action Reviews and Corrective Action Plans, Calian can support communities and organizations in learning from the past to ensure resilience for the future.
